Policies for Selecting and Admitting Students (Master's Degree Program)

1. Admissions Policy

We accept applications from a wide range of candidates from across Japan and overseas who possess solid foundational academic abilities and have a strong desire to deepen their knowledge of specialized fields, learn how to think in an interdisciplinary manner, solve environmental problems, and pioneer new fields of academic enquiry. We also welcome applications from working adults.

2. Selection Policy

We conduct examinations to assess an applicant's foundational academic ability in specialized fields and English, their ability to apply specialized knowledge, their ability to think in an interdisciplinary manner, and their motivation to study. We also have a selection process for international students and working adults. Selections entail a written test, oral test, and interview. The written test mainly assesses the foundational academic ability of the examinees, and the oral test is conducted to evaluate the motivation of applicants.

Policies for Selecting and Admitting Students (Doctoral Degree Program)

1. Admissions Policy

We accept applications from a wide range of people from across Japan and overseas who have advanced academic skills in their specialized fields and a wide-ranging ability to apply their specialized knowledge, and who have built a strong academic foundation with the intention of becoming researchers and leaders and who are highly motivated to deepen their knowledge of specialized fields, learn to think in an interdisciplinary manner, solve environmental problems, and pioneer new fields of academic enquiry. We also welcome applications from working adults.

2. Selection Policy

We conduct examinations to assess whether applicants possess the necessary qualities to become researchers or leaders active within wider society. We assess an applicant's academic ability in specialized fields and English, their ability to apply specialized knowledge, their ability to think in an interdisciplinary manner, and their motivation to study. We also have a selection process for international students and working adults. Selections entail a written test, an oral test, and an interview. The written test is used to assess whether applicants have the necessary academic ability to become researchers or leaders active within wider society, and the oral test is conducted to evaluate whether the applicant has built up a sufficiently strong academic grounding.
